

Sentry® Natural Defense™ Effective. Safe. Natural.

But, for Insects It's a Natural Born Killer!

To protect themselves, certain plants have developed highly effective defense mechanisms against potentially harmful insects. That's the idea behind Sentry Natural Defense. Using a patented formula of natural botanical extracts including peppermint oil, cinnamon oil, lemon grass oil and thyme oil, Sentry created Sentry Natural Defense, a natural line of pet care products to protect against fleas, ticks and mosquitoes.

The U.S. Food and Drug Administration (FDA) approved the plant oils (active ingredients) used in Sentry Natural Defense for use as food and beverage additives for human consumption.

Protect your dog or cat from fleas, ticks and mosquitoes naturally, with Sentry Natural Defense.

How it Works

Invertebrates such as fleas, ticks and mosquitoes produce a neurotransmitter called octopamine. Octopamine regulates insects' heart rate and metabolism. The natural active ingredients in Sentry Natural Defense block octopamine – causing a breakdown of the central nervous system – killing insects almost instantaneously.

Safe for You & Your Pets

Because octopamine is not found in humans or other mammals, birds and fish, the natural active ingredients in Sentry Natural Defense products are safe to use around your family or pets, when used as directed.

In addition, Sentry Natural Defense products are ideal for young, old, pregnant, nursing and debilitated pets.

Sentry® Together With National Wildlife Federation®

Together with Sentry is proud to support the conservation efforts of the National Wildlife Federation.

National Wildlife Federation (NWF) is America's conservation organization inspiring Americans to protect wildlife for our children's future. NWF unites individuals from diverse backgrounds through a grassroots network of 4 million members, supporters and volunteers.

NWF programs educate and inspire people from all walks of life to conserve wildlife and wildlife habitat. NWF focuses its conservation work in three major areas that will have the biggest impact on the future of America's wildlife: confronting climate change, protecting and restoring wildlife habitat and connecting people with nature.

National Wildlife Federation name and logo are trademarks of National Wildlife Federation and are used under license by Sergeant's Pet Care Products, Inc. For more information, visit www.sergeants.com and click on the National Wildlife Federation link.

Frequently Asked Questions

How does Sentry Natural Defense work to kill fleas, ticks & mosquitoes?

The active ingredients in Sentry Natural Defense products block the neurotransmitter octopamine, killing insects almost instantly. Since octopamine is found only in insects, it is safe to use Sentry Natural Defense products around pets and people, when used as directed.

Are Sentry Natural Defense products effective?

YES, Sentry Natural Defense products contain natural active ingredients that kill fleas, ticks and mosquitoes on contact. In addition, the natural ingredients are highly effective in repelling pests.

Do Sentry Natural Defense products have an odor?

Yes, since Sentry Natural Defense formulas use natural active ingredients such as cinnamon, clove, peppermint, lemon grass and thyme, there is a natural spice fragrance. This fragrance will lessen with time.

If I use Sentry Natural Defense, should I use another flea and tick product as well?

NO, we do not recommend using multiple types of flea and tick treatments on the animal for the safety of your pet.

When will Sentry Natural Defense products begin to work?

Sentry Natural Defense products begin to work immediately after they are applied.

How often can I apply Sentry Natural Defense Squeeze-Ons?

Sentry Natural Defense Squeeze-Ons should be applied at least once per month, but if your pet is in a highly infested environment repeat applications should be made if necessary.

How much product should I apply on my cat or dog?

Refer to label directions for correct dosage information. When applying this or any other animal or health care product, make sure you read the label carefully.
